

The Evolving Health Link Model

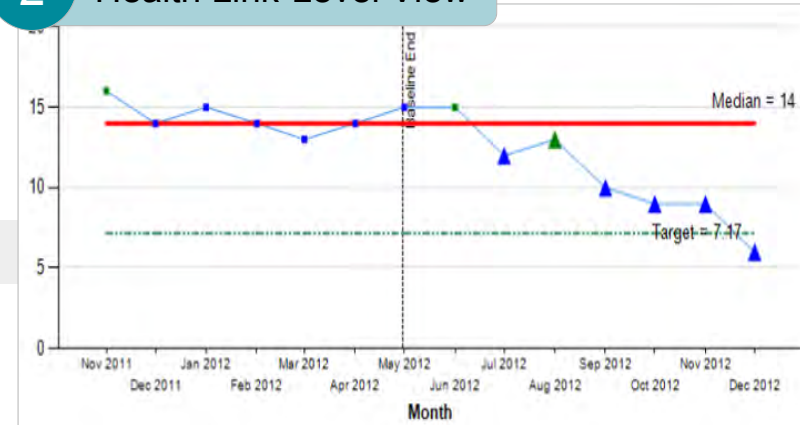

From the MOHLTC: February 2015

Data as a Lever of Change

1 Data Entry

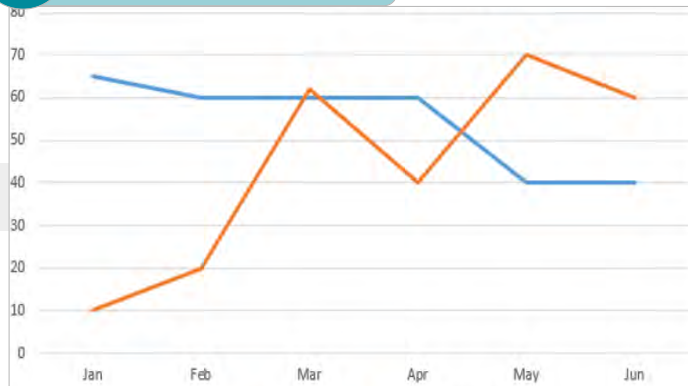

The screenshot shows a web-based form for entering data for a safety measure. The form includes fields for Objective, Measure/Indicator, Unit of Measure, Population, Data Source, Period, Organization, Current Performance, Absolute Target, and Target Justification. A red button at the bottom left says "DELETE THIS MEASURE".

Applying What we Know

Guided by data, using what we know to improve quality, experiences, and outcomes

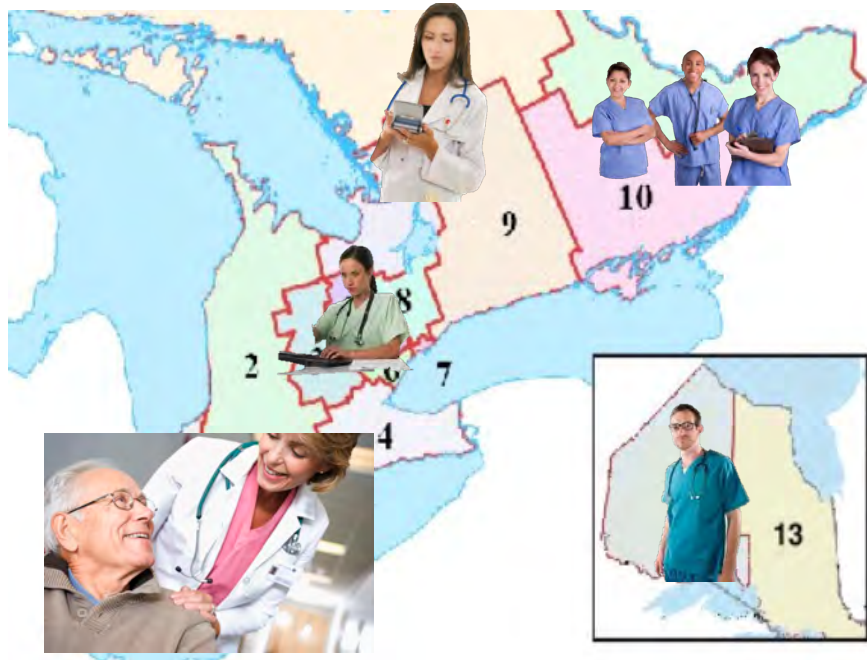

Essential Elements for Success

- ✓ Patient engagement in co-design
- ✓ Understanding critical touch points in the patient experience
- ✓ Primary care engagement and activation
- ✓ Integrated cross-sector care coordination
- ✓ Improved transitions from hospital to home
- ✓ Elements to support operations, e.g., secure communication, letters of collaboration, data sharing agreements

Engaging Across the Province

Using data and collaboration
to go from this...

...to this...

...to improve patient care, outcomes, and health system performance
