

The 26th International System Safety Conference

August 25-29, 2008
Vancouver, Canada
www.issc08.org

Aerospace
Software Safety
Cyber Physical Systems
Environmental
Medical Devices
Patient Safety
Space Systems
Automotive
Maritime
Rail
Critical Infrastructure
Accident Investigation
Risk Management
Robotics
SCADA Systems
Human Factors
Nuclear
Defense
Biological Hazards

Discover the best in system safety at the 26th International System Safety Conference, **August 25-29 2008**. This is an excellent opportunity to gain insight into system safety developments, meet leaders of the discipline, and share your experiences and ideas about your own work.

Invited Presenters:

Erik Hollnagel, Professor and Industrial Safety Chair at École des Mines de Paris

Prof. Nancy Leveson, MIT

Ms. Kathy Fox, Board Member, TSB of Canada

Dr. Richard Cook, Department of Anesthesia and Intensive Care, University of Chicago

Linda Keen, Immediate Past President, Canadian Nuclear Safety Commission

These influential domain experts will present their latest finding on topics ranging from resilient engineering and hazard analysis to transportation, medical and nuclear safety

A Program just for you!

The technical program will feature introductory tutorials, and a rich variety of contributions that include peer reviewed papers, forum papers, workshops, panels and poster sessions.

Daily registrations are available.
